Mean error and assumed cost
Standard noise
Cheaper, noisier measurements
Nondominated designs
Mean squared estimation error
10^{-1}
10^{-2}
0
25
50
75
100
125
Assumed measurement cost (arbitrary units)
512 replicates per design
Mean squared estimation error
10^{-1}
10^{-2}
Dotted/dash-dot curves: analytic variance σ² / n
10^{1}
10^{2}
Measurements per replicate
