(a) Two records of one epidemic
Infections per day (unobserved)
Environmental signal, every 2 days
Reported counts, 1% reported
Record value (log scale)
Days
(b) Precision as the record lengthens
SE of the growth rate (per day)
Days of data
Environmental (closed form)
Environmental (800 simulations)
Counts, 10% reported
Counts, 1% reported
Counts, 0.1% reported
